

## Laying healthy foundations for life...

Children can attend The Smile Centre for free until their fourth birthday and can stay on the Sunny Smiles Plan until their 18th birthday thereby establishing a really positive attitude and thorough understanding of how to maintain dental wellbeing.

We know how important it is to start seeing children as early as possible. Figures published by the NHS suggest nearly a quarter of 5-year-olds have some form of tooth decay. In our modern age, when tooth decay can be avoided, we think that is a tragic statistic and it certainly doesn't reflect the health of the children who have been in our care from an early age.

Our Sunny Smiles Plan, at just £11.00 per child per month, provides two thorough dental examinations, any necessary radiographs (x-rays), and up to two hygienist appointments (one hour) per year. Your child can also take advantage of preventive treatments such as fissure sealants and fluoride applications as prescribed, and oral health education.

**Give your child a sunny smile – it's an investment that should benefit them for a lifetime.**

The Smile Plan does not cover treatment from a specialist, hospital or consultant, nor does it cover implants or cosmetic dentistry. The scheme is unique to this practice and is not transferable. Any payments paid in advance are not refundable but, upon written notification of your withdrawal from the scheme, no further payments will be requested from your bank. The plan will be administered by DPAS Limited who will make a separate arrangement with you to manage your convenient monthly payments. The monthly plan cost includes the charges for management and administration payable by you to DPAS. One-off joining fee: In addition to your first monthly payment, a one-off registration fee of £20.00 per person will be charged, and included in your first Direct Debit payment.

**Plan costs and benefits:**  
**£11.00 per month\***

**The plan provides for:**

- Regular dental examinations and x-rays where necessary
- Hygiene appointments to help keep children's teeth and gums healthy (1 hour per annum)
- Oral health education and brushing advice
- Preventive treatments such as fissure sealants and fluoride applications, as prescribed

\* All prices are per person  
Acceptance onto these dental plans are subject to approval by your dentist
